

Company Profile

Techno Frame Solutions Sdn Bhd

Introduction

Techno Frame Solutions is a manufacturer of light gauge rollformed steel profiles and accessories for drywall, ceiling and cladding applications. We offer a wide range of components and systems including contract manufacturing for some international brands.

Although we are a relatively new company, but is managed by a team of engineers who has vast experience in the industry with more than 15 years participating in many significant projects in the region which covers South East Asia, the Middle East, India, the Pacific and Southern China. We have worked together with many international wall and ceiling lining manufacturers, supplying framing for both internal and external applications.

We pride ourselves to be a technical inclined organisation and our expertise in offering engineered solutions to our customers, manufacture high quality products which can be compared to the best in the industry. The steel coils (our core raw material) we used are sourced only from reputable steel mills to meet required specifications.

Our vision:

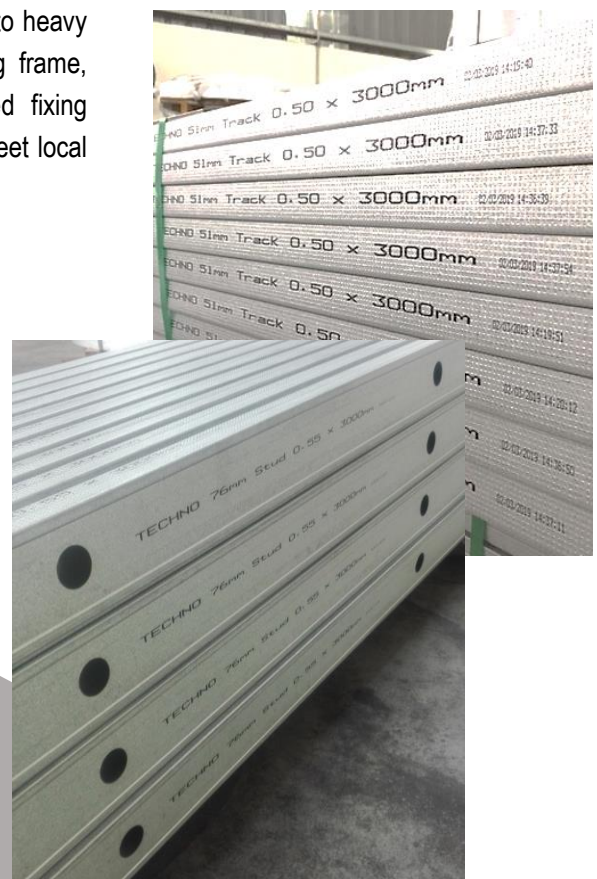

Always Delivering Excellent Products and Solutions To Our Customers

We are located in Rawang, just outside Kuala Lumpur which allow us to service our customers in the local market and also easy access to port for our overseas customers. Our core team consist of experienced engineers and we work very closely with our customers to provide technical support in terms of design solutions, site inspection and training.

We manufacture a full range of wall frames profiles from regular to heavy duty profiles for external façade applications, profiles for ceiling frame, complemented by a whole range of standard and customised fixing accessories (brackets and clips). These products are tested to meet local and international standards.

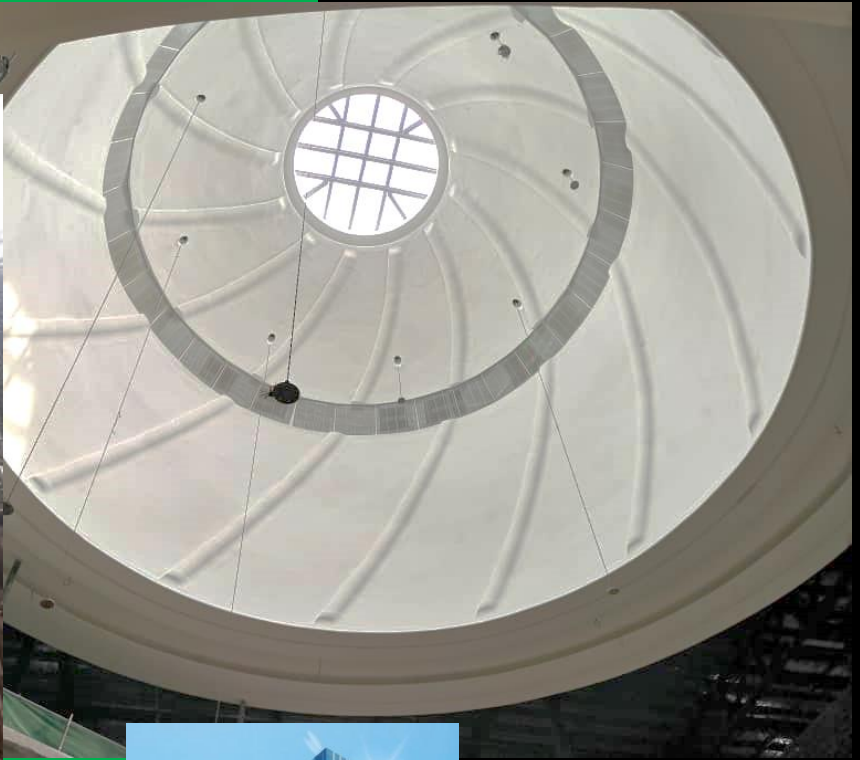

Our products and services include but not limited to the following:

- Drywall
- Ceiling
- Facades
- Flooring
- Access Panels
